

MISSION STATEMENT

The Service of Health Visitors is supported by the Hungarian state in order to ensure for its citizens to conceive, be born and reared in the most advantageous circumstances, in good health, safety and love.

The main goal of health visitors since the foundation of the Service has been the protection, the preservation and the development of the health conditions of women, infants, children and adults under their care.

These tasks are fulfilled within the framework of the Health Visitors' care on a regional level in schools and hospitals, in co-operation with curative-preventive professionals and social services.

The main activities of health visitors are prevention through counselling, family centered, supportive and humane caregiving – the basic elements of which are acceptance and providing help.

The main task of the Service is to ensure equal chances for all citizens and access to its services for everybody. In order to achieve these goals health visitors provide a state budget funded service for citizens free of charge.

Health visitors continuously endeavour to take into account the needs of the citizens, to adapt to their expectations and to win their satisfaction. It is especially important for health visitors to keep and to develop the level of their services.

The guarantee for this is the love of and the vocation for their profession.
